

# The trusted columns for your USP methods

The Thermo Scientific™ Hypersil™ BDS and ODS columns are highly reproducible and robust columns. Hypersil stationary phases are recognized as an industry standard in HPLC. Years of manufacturing experience ensure that they deliver consistent performance for a wide range of applications. These economical columns provide exceptional reliability for QA/QC labs.

**Hypersil columns have been used for assay and organic impurity methods in the United States Pharmacopeia - National Formulary (USP-NF) and for methods proposed for future inclusion in the USP-NF and are proven and trusted columns in many HPLC methods worldwide.**
